## **Corps of Engineers seeks comments on proposed Master Plan supplement for B.A. Steinhagen Lake**

Fort Worth, TX – The U.S. Army Corps of Engineers announced today the release of a draft supplement to the B.A. Steinhagen Lake Master Plan. The most recent version of this Master Plan was published in December 1971.

A Corps interdisciplinary team formulated the supplement to bring the Master Plan into compliance with Corps-wide master plan regulations and to have the Master Plan in harmony with current management philosophies. Included in this supplement are minor changes in the land classification of several areas around the lake. The supplement and classification changes will not result in any functional alteration in the management of the areas.

The Draft Supplement is available for review at the Sam Rayburn Reservoir and the B.A. Steinhagen Lake Offices or on the Corps website at
